        <script type="text/javascript" src="js/easing.js"></script>
        <script type="text/javascript">
            jQuery(document).ready(function($) {
                $(".scroll").click(function(event){
                    event.preventDefault();
                    $('html,body').animate({scrollTop:$(this.hash).offset().top},1000);
                });
            });
        </script>
```

OUTPUT:

- The website will open and the index page will be displayed.

The contents that are present on the index page is basically what the company 'Quality Theorem' is all about. The products that they create and how they create it, their mission and vision, the main authorities of the company and how they can be contacted.

- Once you click the 'User Login' button, a new login page will be directed whereby the user has to login using his/her given credentials.
- In the same way, in 'Admin Login', the administrator login page will be directed where he/she has to login using the given credentials.
- For a new user to register, they have to press the registration button and sign up by providing the necessary information.
- By pressing the contact button, information necessary to get in touch with the officials will be provided.
- By pressing the about button, the details of the company 'Quality Theorem' will be provided.
- If a user wants to login, username and password must be obtained and he/she will be able to login only and only if they match the details that have been previously stored.
- Once the user has successfully logged in, the user dashboard will be displayed to the given user and in the user dashboard, information will be displayed according to his or her credentials.

- The same way,if an admin wants to login,the credentials must match with the information stored and once this is possible,the admin dashboard page is directed whereby an admin can add an examination,view his or her information,view the current active users and display the results for the students.
- If a new user wants to sign up,then he or she can't directly login,they first need to sign up and make sure they provide correct information which will be stored for later use.
- Contact displays all the details that are necessary in order to get in touch with the required officials of the company.
- About displays all the details that are connected to the company 'Quality Theorem' whereby all the information necessary for the users and customers of the web page that they need to know and that is important to be told to them will be mentioned.The main aim and objective will also be mentioned.
- The index page basically consists of all the important segments and it is the landing page using which everything else are inter-connected to each other.

WHAT WE CREATE

IoT Solutions

Providing solutions from machine to dashboard

Smart solutions

MISSION AND VISION

MISSION :

Quality Theorem is fully committed to delivering the best state-of-the-art technology services of impeccable quality to our clients and help them maximize their ROI in a thoroughly professional manner; deploy the best possible resources - people, products and solutions as needed by the clients; for the employees, partners and vendors to be one of the best organizations to work for.

VISION :

Mission : Quality Theorem is fully committed to deliver the best state of the art technology services of impeccable quality to our clients and help them maximize their ROI in a thoroughly professional manner; deploy the best possible resources - people, products and solutions as needed by the clients; for the employees, partners and vendors to be one of the best organizations to work for.

USER DASHBOARD REPORT

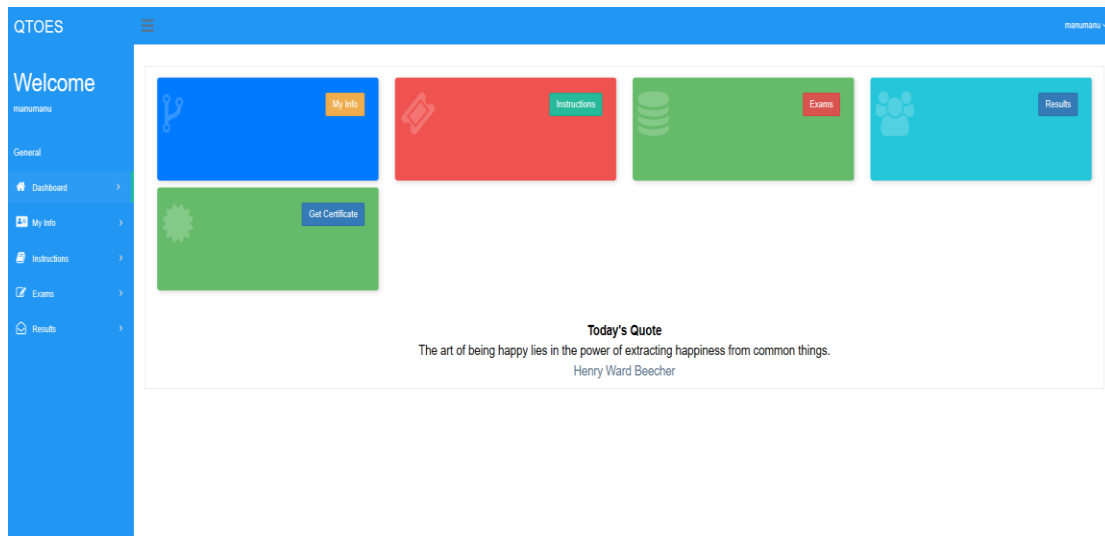

INPUT:

- Once the user signs in using the given credentials, they can view the dashboard.
- The user dashboard contains user information, instructions, examinations to be answered and the results.
- The main code contains Cascading Style Sheets that contain segments necessary for proper illustration of the web page with properties like font, font size, background colour and many others.
- The code is sub-divided into three parts; header, dashboard and the footer.
- It also contains necessary JavaScript codes.

```
<?php session_start();
include "header.php";
?>

<!-- page content area main -->
<div class="right_col" role="main">
  <div class="">
    <div class="page-title">
      <div class="title_left">
      </div>
      <div class="title_right">
        <div class="col-md-5 col-sm-5 col-xs-12 form-group pull-right top_search">
        </div>
      </div>
    </div>
  </div>
  <div class="clearfix"></div>
  <div class="row" style="min-height:500px">
    <div class="col-md-12 col-sm-12 col-xs-12">
      <div class="x_panel">
        <link rel="stylesheet" href="https://cdnjs.cloudflare.com/ajax/libs/font-awesome/4.7.0/css/font-awesome.css" />
        <div class="container">
          <div class="row">
            <div class="col-md-3">
              <div class="card-counter primary">
                <i class="fa fa-code-fork"></i>
                <span class="count-numbers"></span>
                <span class="count-numbers"> <button type="button" class="btn btn-warning" onclick="window.location.href = '../user_profile.php'">My Info</button></span>
              </div>
            </div>
          </div>
        </div>
      </div>
    </div>
  </div>
</div>
```

OUTPUT:

- On clicking the 'My info' button, a new page will be directed where all the details of that given user will be displayed.
- On clicking the 'Instructions' button, a new page will be directed whereby the necessary instructions that are to be kept in mind while answering the examinations will be displayed.
- On clicking the 'Exam' button, a new page will be directed where all the examinations that need your response will be displayed.
- On clicking the 'Results' button, the results of the examinations if available will be displayed.
- In the centre of the page, there consists of quotes that are generated time by time.
- The details that are to be displayed may include name, address, email id, previous grades of the students, etc.
- Instructions will display all the rules and regulations that need to be followed while answering the given exam and how much time will be provided as well.

- Exam is where all the details in connection with the examinations for example the subject,duration,etc.
- Results is where the final marks attained by the students will be displayed after the evaluation of that given examination is done.
- Basically,in the user dashboard,once a user has logged in using the given credentials,all these buttons will be displayed which are;
- information about that given user,
- instructions that need to be followed in order to complete that given examination correctly,
- the examinations that need attention and have to be answered before a given deadline
- And finally the results of the examinations that have been answered and evaluated.
- Every individual user gets all this information based on their requirements and how they wish to complete the given course.
- At the end,the user can get the certificate by clicking the ‘get certificate’ button.

ADMIN DASHBOARD REPORT

INPUT:

- Once the administrator of the web page signs in using the required credentials, he/she can view the dashboard.
- The php code required for admin dashboard is sub-divided into three parts; header, footer and dashboard.
- Header consists of the extreme upper and leftmost side of the web page whereas footer consists of the bottom part.

```

<?php session_start();
include "header.php";
?>

<!-- page content area main -->
<div class="right_col" role="main">
  <div class="">
    <div class="page-title">
      <div class="title_left">
      </div>

      <div class="title_right">
        <div class="col-md-5 col-sm-5 col-xs-12 form-group pull-right top_search">

        />
        <div class="container">
          <div class="row">
            <div class="col-md-3">
              <div class="card-counter primary">
                <i class="fa fa-code-fork"></i>
                <span class="count-numbers"></span>
                <span class="count-numbers"> <button type="button" class="btn btn-warning">My Info</button></span>
              </div>
            </div>
            <div class="col-md-3">
              <div class="card-counter danger">

```

OUTPUT:

- The web page consisting of the admin dashboard is displayed.
- The dashboard consists of information regarding the administrator, the users that are currently there, when there is a need to add an examination and to display the results as well.

- On clicking the 'My info' button, all the details regarding the administrator will be displayed in a new page.

- All necessary information regarding the admin will be displayed and along with this, it will be displayed accordingly as per the given administrator.
- Information like name, email address and other important information will be displayed.
- On clicking the 'View Users' button, all the active users that have written an examination or yet to write one will be displayed in a new page.
- Once view users is clicked, all the users that require that given examination and according to their given course, information will be displayed as required for that given admin.
- Information regarding the number of users that have registered for a particular examination can be viewed here.
- Add exam is something that can be done only by the admin and as the name states, it is something that can be used when a necessary examination has to be added to the web site and accessible by the given users.
- Here the examination can be added subject wise and course wise and it has to be added in such a way that it is visible only to the users that have applied for it.
- Results are displayed once they have been evaluated and can be shown to the admin.

- In ‘add domain’,the administrator can add a domain into the website using which questions can be added which can be answered by the students.
- In ‘Assign exam’,a given examination will be assigned by the administrator to a particular section of the users.
- In ‘Feedback’,the administrator will be able to give valid feedback regarding issues or positive outcomes obtained.
- In ‘Graph analytics’,the graphical view of the number of students that have been attempting the examinations,timely is mentioned.
- In ‘View profile’,the profiles of the users can be viewed.
- In ‘Edit Questions’,the administrator can edit the given questions and make the required changes accordingly.
- In ‘Add users’,the administrator is allowed to add users that will be able to answer the examinations.

    `admin_id` int(10) NOT NULL,  
    `name` varchar(25) NOT NULL,  
    `phone` varchar(10) NOT NULL,  
    `email` varchar(20) NOT NULL,  
    `user_name` varchar(25) NOT NULL,  
    `password` varchar(10) NOT NULL  
) ENGINE=InnoDB DEFAULT CHARSET=latin1;
```

```
ALTER TABLE `admin`  
    ADD PRIMARY KEY (`admin_id`),  
    ADD UNIQUE KEY `email` (`email`),  
    ADD UNIQUE KEY `user_name` (`user_name`),  
    ADD UNIQUE KEY `password` (`password`);
```

```
ALTER TABLE `admin`  
    MODIFY `admin_id` int(10) NOT NULL AUTO_INCREMENT,  
    AUTO_INCREMENT=2;
```

- The table 'admin' is created as follows and the primary key is 'admin_id'. 'email', 'user_name' and 'password' are the unique keys of the given table.
- The admin is the person who is responsible for handling the entire website and making sure that examinations are provided and the users can view their results. Basically, the admin is incharge of the entire website.

- Output

admin_id	name	phone	email	user_name	password
----------	------	-------	-------	-----------	----------

2. Assigned Exam

- SQL Code

```
CREATE TABLE `assigned_exam` (  
  `s_no` int(10) NOT NULL,  
  `u_id` int(10) NOT NULL,  
  `d_id` int(10) NOT NULL,  
  `timealloted` varchar(10) NOT NULL,  
  `noofquestions` int(11) NOT NULL  
) ENGINE=InnoDB DEFAULT CHARSET=latin1;
```

```
ALTER TABLE `assigned_exam`  
  ADD PRIMARY KEY (`s_no`),  
  ADD KEY `u_id` (`u_id`),  
  ADD KEY `d_id` (`d_id`);
```

```
ALTER TABLE `assigned_exam`  
  MODIFY `s_no` int(10) NOT NULL AUTO_INCREMENT,  
  AUTO_INCREMENT=38;
```

```
ALTER TABLE `assigned_exam`  
  ADD CONSTRAINT `assigned_exam_ibfk_1` FOREIGN KEY  
  (`u_id`) REFERENCES `user` (`user_id`),
```

```
ADD CONSTRAINT `assigned_exam_ibfk_2` FOREIGN KEY  
(`d_id`) REFERENCES `domain` (`d_id`);
```

- The primary key is 's_no','u_id','d_id' and 'noofquestions' are the unique keys in the table 'assigned_exam'.
- Assigned exam consists of all the question papers that are made available to the user at that given time and the ones that have been added at that moment. The users have to answer these questions.
- 'u_id' of the given table 'assigned_exam' is marked as a foreign key which is derived from the table 'user' where it is represented as 'user_id'.
- 'd_id' from the given table called 'assigned_exam' is marked as a foreign key which is derived from the table 'domain' where it is represented as 'd_id'.

- Output

s_no	u_id	d_id	timealloted	noofquestions
------	------	------	-------------	---------------

3.Domain

- SQL Code

```
CREATE TABLE `domain` (  
  `d_id` int(10) NOT NULL,  
  `dname` varchar(25) NOT NULL  
) ENGINE=InnoDB DEFAULT CHARSET=latin1;
```

```
ALTER TABLE `domain`  
    MODIFY `d_id` int(10) NOT NULL AUTO_INCREMENT,  
    AUTO_INCREMENT=10;
```

```
ALTER TABLE `domain`  
    ADD PRIMARY KEY (`d_id`);
```

- The primary key in this table is 'd_id'.
- Domain table consists of the domain identity number and the domain name that helps to differentiate between the different domains.
- Output

d_id	dname
------	-------

4.Java

- SQL Code

```
CREATE TABLE `java` (  
    `q_id` int(20) NOT NULL,  
    `question` varchar(200) NOT NULL,  
    `op1` varchar(200) NOT NULL,  
    `op2` varchar(200) NOT NULL,  
    `op3` varchar(200) NOT NULL,
```

```

    `op4` varchar(200) NOT NULL,
    `level` int(1) NOT NULL
) ENGINE=InnoDB DEFAULT CHARSET=latin1;

```

```

ALTER TABLE `java`
ADD PRIMARY KEY (`q_id`);

```

```

ALTER TABLE `java`
MODIFY `q_id` int(20) NOT NULL AUTO_INCREMENT,
AUTO_INCREMENT=2;

```

- Java is just an example of a question paper that 'assigned_exam' contains. It can contain several such examinations. It contains 'question' where the entire question will be stored and the four options out of which one needs to be selected.
- The primary key is 'q_id' which stands for question id whereas 'level' is marked as a unique key.
- Output

q_id	question	op1	op2	op3	op4	level
------	----------	-----	-----	-----	-----	-------

5. User

- SQL Code

```

CREATE TABLE `user` (
    `user_id` int(10) NOT NULL,
    `name` varchar(25) NOT NULL,

```

```

`phone` varchar(10) NOT NULL,
`address` varchar(100) NOT NULL,
`email` varchar(30) NOT NULL,
`qualification` varchar(25) NOT NULL,
`user_name` varchar(20) NOT NULL,
`password` varchar(20) NOT NULL
) ENGINE=InnoDB DEFAULT CHARSET=latin1;

```

```

ALTER TABLE `user`
  ADD PRIMARY KEY (`user_id`),
  ADD UNIQUE KEY `email` (`email`);
  ADD UNIQUE KEY `user_name`(`user_name`);

```

```

ALTER TABLE `user`
  MODIFY `user_id` int(10) NOT NULL AUTO_INCREMENT,
  AUTO_INCREMENT=24;

```

- ‘user_id’ is the primary key whereas ‘email’ and ‘user_name’ are the unique keys in the given table of user.
- There can be several users and each of them have to be stored in the given database with the given credentials.

- Output

user_id	name	phone	address	email	qualification	user_name	password
---------	------	-------	---------	-------	---------------	-----------	----------

6. Result

- SQL Code

```
CREATE TABLE `result` (  
  `r_id` int(10) NOT NULL,  
  `u_id` int(10) NOT NULL,  
  `d_id` int(10) NOT NULL,  
  `l1` int(5) NOT NULL,  
  `l2` int(5) NOT NULL,  
  `l3` int(5) NOT NULL,  
  `marks` int(10) NOT NULL,  
  `dateandtime` timestamp NOT NULL DEFAULT  
CURRENT_TIMESTAMP ON UPDATE CURRENT_TIMESTAMP  
) ENGINE=InnoDB DEFAULT CHARSET=latin1;
```

```
ALTER TABLE `result`  
  ADD PRIMARY KEY (`r_id`),  
  ADD KEY `d_id` (`d_id`),  
  ADD KEY `u_id` (`u_id`);
```

```
ALTER TABLE `result`  
  MODIFY `r_id` int(10) NOT NULL AUTO_INCREMENT,  
  AUTO_INCREMENT=58;
```

```
ALTER TABLE `result`  
  ADD CONSTRAINT `result_ibfk_1` FOREIGN KEY (`d_id`)  
REFERENCES `domain` (`d_id`),  
  ADD CONSTRAINT `result_ibfk_2` FOREIGN KEY (`u_id`)  
REFERENCES `user` (`user_id`) ON DELETE CASCADE;
```

- The primary key of this table is 'r_id' whereas 'marks', 'u_id', 'd_id', 'l1', 'l2', 'l3' are marked as unique keys.
- Results are displayed individually and according to each given user and this is also handled by the the admin.
- 'u_id' of the given table 'results' is marked as a foreign key which is derieved from the table 'user' where it is represented as 'user_id'.
- 'd_id' from the given table called 'results' is marked as a foreign key which is derieved from the table 'domain' where it is represented as 'd_id'.
- Output

r_id	u_id	d_id	l1	l2	l3	marks	dateandtime
------	------	------	----	----	----	-------	-------------

7. Certificate

- SQL Code

```
CREATE TABLE `feedback` (
  `fname` varchar(50) NOT NULL,
  `email` varchar(50) NOT NULL,
  `message` varchar(500) NOT NULL
) ENGINE=InnoDB DEFAULT CHARSET=latin1;
```

```
ALTER TABLE `certificate`
```

```
ADD PRIMARY KEY (`certificate_id`),  
ADD KEY `d_id` (`d_id`),  
ADD KEY `certificate_ibfk_1` (`u_id`);
```

```
ALTER TABLE `certificate`  
  MODIFY `certificate_id` int(30) NOT NULL AUTO_INCREMENT,  
  AUTO_INCREMENT=21;
```

```
ALTER TABLE `certificate`  
  ADD CONSTRAINT `certificate_ibfk_1` FOREIGN KEY (`u_id`)  
  REFERENCES `user` (`user_id`) ON DELETE CASCADE,  
  ADD CONSTRAINT `certificate_ibfk_2` FOREIGN KEY (`d_id`)  
  REFERENCES `domain` (`d_id`);
```

- The primary key of this table is 'certificate_id'. 'd_id' and 'u_id' are marked as the unique keys in this given table.
- 'u_id' of the given table 'certificate' is marked as a foreign key which is derived from the table 'user' where it is represented as 'user_id'.
- 'd_id' from the given table called 'certificate' is marked as a foreign key which is derived from the table 'domain' where it is represented as 'd_id'.
- A certificate is granted to a given user by the admin at the time of successful completion of the examination and once the results are obtained.
- Output

certificate_id	u_id	d_id
----------------	------	------

8. FEEDBACK

- SQL Code

```
CREATE TABLE `feedback` (  
    `fname` varchar(50) NOT NULL,  
    `email` varchar(50) NOT NULL,  
    `message` varchar(500) NOT NULL  
) ENGINE=InnoDB DEFAULT CHARSET=latin1;
```

- This is where all the queries and information that needs to be communicated between the users and the admin is stored and detailed in.

- Output

fname	email	message
-------	-------	---------

USER'S INSTRUCTIONS DOCUMENTATION

INPUT

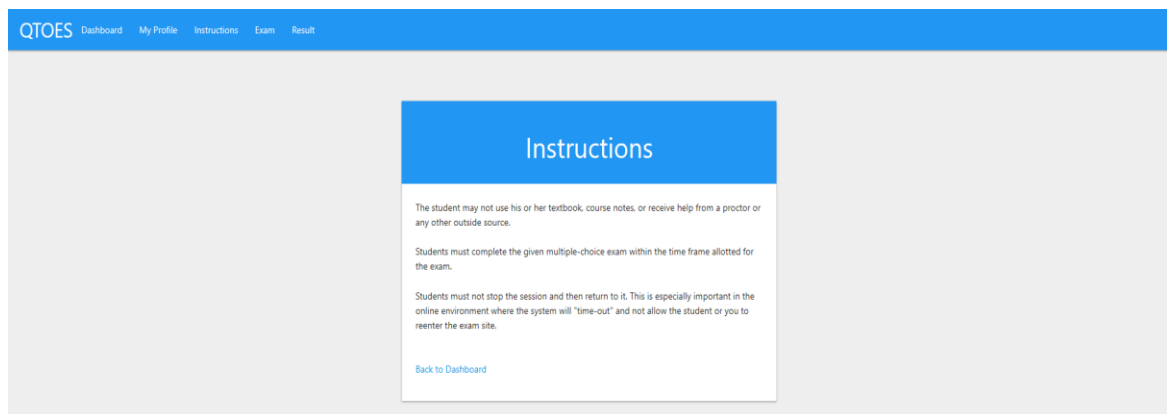

- The instructions that the user has to follow while answering the examination and the things that need to be kept in mind are written in this section of the code.
- The php code contains the detailed instructions and the entire code contains internal Cascading Style Sheet as well.

```

1  <?php session_start();
2  include "fixednavbar.php";
3  ?>
4  <!DOCTYPE html>
5  <!-- Requires lot of PHP see comments. Displaying user profile data -->
6  <html lang="en" dir="ltr">
7
8
9  <head>
10     <meta charset="utf-8">
11     <title>My Profile</title>
12
13
14     <link href="https://fonts.googleapis.com/icon?family=Material+Icons" rel="stylesheet">

37         <div class="col s12 m4 offset-m4">
38             <div class="card">
39                 <div class="card-action blue white-text">
40                     <!-- Fetch the data from the database and use it in the following mentioned fields -->

```

OUTPUT

- The above is the output that is obtained when the php code is executed.

- As shown in the diagram above which is the output obtained, the instructions can be modified according to each examination or user.
- The instructions section will be present in the dashboard and it will be displayed when the instructions button will be clicked.
- These instructions need to be followed by the users in order to successfully complete the examination and obtain the certificate and results of the examination.
- If the instructions displayed are not correctly followed by the given users, that is to say, a particular user violates one of the rules, then, the examination will get terminated at that particular moment.
- A user has to go back once he or she has viewed the instructions and the page is redirected back to the dashboard.
